

Amendment to the Claims

There is a prior version, and listing, of claims in this application.

Listing of Claims

Claims 1 through 26 (cancelled).

Claim 27. (re-presented - formerly dependent claim 22)
A printer, comprising: a housing having a top portion with manually operable keys, a print head, an electric motor, a platen roll driven by the electric motor and cooperable with the print head, a space for a supply roll of a printable web, a door movable between open and closed positions, a pair of holder members connected to move in unison to hold a supply roll, wherein the holder members are mounted on the door and are cooperable to hold supply rolls of different widths, and the electric motor being disposed generally between the keys and the supply roll space.

Claim 28. (re-presented - formerly dependent claim 23)
A printer, comprising: a housing having a top portion with manually operable keys, a print head, an electric motor, a platen roll driven by the electric motor and cooperable with the print head, a space for a supply roll of a printable web, a door movable between open and closed positions, a pair of holder members connected to move in unison to hold a supply roll, wherein the holder members are mounted on the door, and

the electric motor being disposed generally between the keys and the supply roll space.

Claim 29. (re-presented – formerly dependent claim 24)
A printer as defined in claim 28, wherein the door is a front door.

Claim 30. (re-presented – formerly dependent claim 25)
A housing having a top portion with manually operable keys, a print head, an electric motor, a platen roll driven by the electric motor and cooperable with the print head, a space for a supply roll of a printable web, the electric motor being disposed between the keys and the supply roll space, a door movable between open and closed positions, a battery compartment accessible when the door is in the open position, and a label delaminator disposed on the door.
